## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities: On pages 4-8 of the specification, specific mention of the claims is made throughout. Since the claims typically change throughout prosecution, specific claims should not be mentioned in the specification.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7,9-17, 23, 24, 29, 30, and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required

feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 7, 15, 23, 24 and 33 recite the broad recitations (spring element, 5-50 degrees, 15-25 degrees), and the claim also recites (pressure spring, 30 degrees, 17 degrees) which is the narrower statement of the range/limitation.

Claims 9, 10, and 11 recite the limitation "the tooth elements" in lines 2, 2, and 9, respectively. There is insufficient antecedent basis for this limitation in the claim.

Claim 12 recites the limitation "the axially protruding tooth elements" in lines 6-7. There is insufficient antecedent basis for this limitation in the claim.

Also in claim 12, line 4, the phrase "with the roller axle is arranged in said basic body" is confusing.

Claim 29 recites the limitation "the roll like transmitting roller and the setting lever" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim.

Claim 30 recites the limitation "the hollow-cylindrical, roll-like transmitting roller" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim.

Claim 33 recites the limitation "the angle of swivel" in line 2. There is insufficient antecedent basis for this limitation in the claim.

***Allowable Subject Matter***

4. Claims 1-6, 8, 18-21, 25-28, 31, 32 and 34 are allowed.
5. Claims 7, 9-17, 23, 24, 29, 30, and 33 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
